

ORAÉ[®]

**WORLD'S FIRST
LOW-CARBON GLASS
WITH VERIFIED EPD**

SAINT-GOBAIN GLASS

ORAÉ®

WORLD'S FIRST LOW-CARBON GLASS WITH VERIFIED EPD

With **ORAÉ®**, Saint-Gobain Glass has achieved a landmark technical breakthrough enabling it to offer a low embodied carbon glass on the market thanks to a substantial R&D effort and the excellence of our industrial teams.

Its low carbon footprint of 6.64 kg of CO₂ eq./m² for a 4 mm glass, is achieved through the use of high amount of recycled content (64%) and renewable electricity.

This innovation will help to significantly reduce the carbon footprint of construction and accelerate the development of the circular economy.

APPLICATIONS

ORAÉ® can be used for new buildings or renovation, residential or non-residential. ORAÉ® can replace standard clear glass of the same thickness, whatever the application:

- **Building envelope:** insulating glazing for windows, facade elements or glass roofs.
- **Other external or internal applications** (e.g., balustrades, doors, partitions...): upon request.

PERFORMANCES

ORAÉ® provides the **same performances and quality** as PLANICLEAR®, with a much lower carbon footprint.

According to its verified EPD, the **ORAÉ®** substrate has a **carbon footprint of only 6.64 kg CO₂ eq./m²** (for a 4mm substrate), bringing a **reduction of 42%** compared to our European standard product PLANICLEAR®.

	Light Transmission (LT) ¹	Solar Factor (g-value) ¹	Outside reflection (LRe) ¹	Inside reflection (LRI) ¹	Carbon footprint (GWP) A1-A3 ²	Carbon footprint (GWP) A to C ³	Carbon reduction vs. PLANICLEAR® ³
	[%]	[%]	[%]	[%]	[kg CO ₂ eq/m ²]	[kg CO ₂ eq/m ²]	[%]
ORAÉ® 4 mm	91	88	8	8	5.88	6.64	-42%
PLANICLEAR® 4 mm	91	88	8	8	10.90	11.50	

¹ According to EN410

² Global Warming Potential (GWP) A1-A3 Stages (Cradle to Gate); detailed environmental data are documented in the available Environmental Product Declarations (EPD) of PLANICLEAR® and ORAÉ®. Only complete EPD can be verified by an external third party.

³ Global Warming Potential (GWP) A-C Stages (Cradle to Grave); detailed environmental data are documented in the available Environmental Product Declarations (EPD) of PLANICLEAR® and ORAÉ®. Only complete EPD can be verified by an external third party.

RANGE

ORAÉ® is available as:

- Monolithic clear float glass (in 3, 4, 6, 8 and 10 mm)
- Assembled in STADIP® or STADIP SILENCE® for safety or reinforced acoustic insulation
- Combined with the highly selective solar control product families **COOL-LITE® XTREME** and **COOL-LITE® SKN**
- Combined with summer comfort coatings of the product family **PLANISTAR®**
- Combined with Low-e coatings of the product families **ECLAZ®**

Please contact your local sales or specification teams to know the available offer in your country.

DETAILED RANGE OF COATED ORAÉ®

Our coated ORAÉ® products are available in standard sizes and thicknesses (3, 4, 6, 8 and 10 mm). They provide the **same aesthetics, performances and quality** as on PLANICLEAR®, with a much lower carbon footprint.

For double or triple glazing units, all panes should be made with ORAÉ® to minimize the carbon footprint.

COATED ORAÉ® FOR FAÇADE APPLICATIONS

COOL-LITE® XTREME ORAÉ® COOL-LITE® SKN ORAÉ®

Intended for use in the glazed parts of a façade (e.g., curtain wall, double skin façade, skylight...), COOL-LITE® ORAÉ® is a perfect response to the stricter sustainability requirements of the building industry without any compromise on technical or aesthetic performance.

COOL-LITE® ORAÉ® provides the best of both embodied and operational carbon levels, thanks to:

- The glass substrate ORAÉ®, with its low carbon footprint verified by an Environmental Product Declaration (EPD)
- The excellent energy performances of the COOL-LITE® XTREME and COOL-LITE® SKN coatings, which already drastically reduce carbon emissions generated by energy consumption when using the building, thanks to its high performance in terms of daylight intake, solar control and thermal insulation.

COATED ORAÉ® FOR WINDOW APPLICATIONS

PLANISTAR® ORAÉ® ECLAZ® ORAÉ®

For windows dedicated to non-residential or residential applications, ORAÉ® is available with a complete range of summer comfort or low-e coatings, offering at the same time

- Low embodied carbon footprint of the glass substrate ORAÉ®
- High thermal performances of the products from the PLANISTAR® or ECLAZ® families for wiser energy consumption and a reduced operational carbon footprint.

As the windows offer is country defined, please contact your local sales team to confirm the low-e or summer comfort offer availability

PERFORMANCES OF COATED ORAÉ®

According to its verified EPD, coated ORAÉ® has a **carbon footprint of only 10.71 kg CO₂ eq./m²** (for a 6mm substrate), bringing a **reduction of 43%** compared to our European standard product coated PLANICLEAR®.

	Carbon footprint (GWP) A1-A3 ² [kg CO ₂ eq./m ²]	Carbon footprint (GWP) A to C ³ [kg CO ₂ eq./m ²]	Carbon reduction vs. PLANICLEAR® ³ [%]
coated ORAÉ® 6 mm	9.21	10.26	-43%
coated PLANICLEAR® 6 mm	17.40	18.11	

Processed and assembled in insulated glazing unit, the reduction is then around 30% to 40%.

	Carbon footprint (GWP) ^{2,4} [kg CO ₂ eq./m ²]	Carbon reduction vs. PLANICLEAR® ^{2,4} [%]
Standard build-up double glazing unit (DGU) 6/16/4 mm one pane coated, 90% Argon		

coated ORAÉ® (face #2 or #3)	24	-39%
tempered coated ORAÉ® (face #2 or #3)	28	-36%

	Carbon footprint (GWP) ^{2,4} [kg CO ₂ eq./m ²]	Carbon reduction vs. PLANICLEAR® ^{2,4} [%]
Standard build-up Triple glazing unit (TGU) 6/12/4/12/4 mm 2 panes coated, 90% Argon		

coated ORAÉ® (2 panes coated)	36	-38%
tempered coated ORAÉ® + coated ORAÉ®	39	-35%

² Global Warming Potential (GWP A1-A3 Stages) values with PLANICLEAR® and ORAÉ® are calculations made with Calumen® for each composition of insulated glazing unit (IGU) on the basis of the standard EN 15804+A2. Detailed environmental data are documented in the available Environmental Product Declarations (EPD) of PLANICLEAR® and ORAÉ®. Only complete EPD can be verified by an external third party.

⁴ All panes of the IGU with the same substrate: first pane respectively annealed or tempered (II) with the same glass compositions; counter panes always annealed.

SAINT-GOBAIN GLASS

Glass, known for its durability, has the incredible quality of being completely recyclable, and it can be recycled endlessly, without any compromise in its mechanical or chemical attributes.

At Saint-Gobain Glass, we put circularity at the heart of our activities. We commit to increase the percentage of cullet (scraps of glass) used in the production of our float glass to 40% by 2030.

Incorporating 1 ton of cullet into our glass production yields to significant environmental benefits:

- Reducing CO₂ emissions by 700 kg (scopes 1, 2 & 3).
- Preserving 1.2 tons of virgin raw materials.

At Saint-Gobain Glass, we aim to increase cullet coming from external sources. Buildings approaching the end of their lifespan should be viewed as a valuable resource of materials. We have a deep knowledge on what can be considered as cullet, and for any demolition or renovation project, Saint-Gobain Glass is here to offer you consistent support.

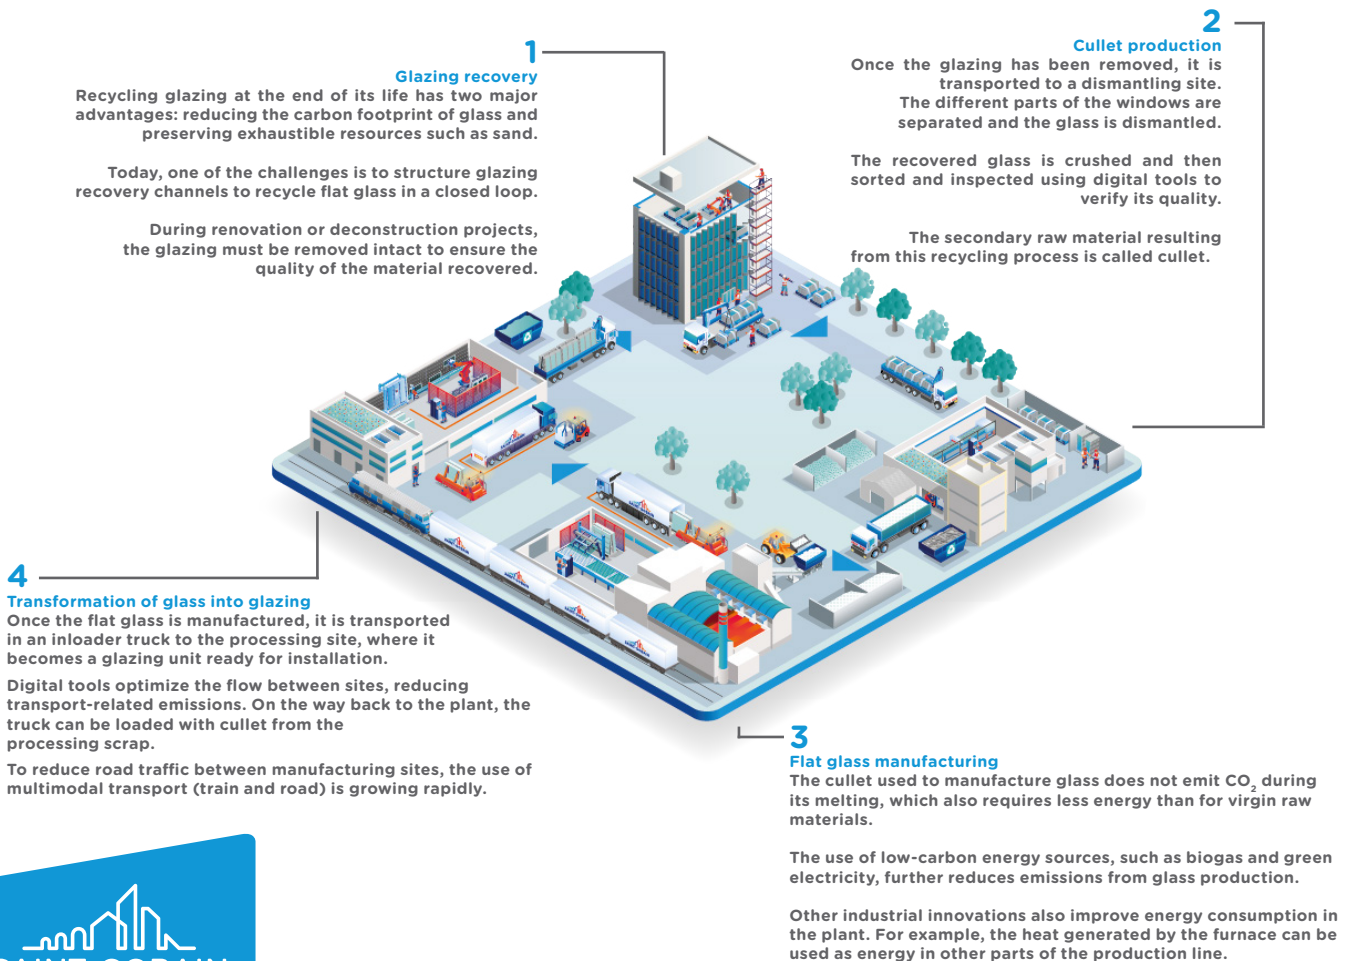

WHERE DOES THE RECYCLED CONTENT OF ORAÉ® COMES FROM?

The recycled content in ORAÉ® comes mainly from glass scraps (cullet) coming from processing plants and also from a growing part of the treatment of glazings at the end of their life.

Thanks to the development of the Saint-Gobain Glass Recycling network, committed to closed-loop recycling the use of cullet from end of life glazing grows every year.
